[My Portfolio](#)

Summary

Full-stack engineer shipping web applications, blockchain-integrated systems, and LLM-powered products using React, Next.js, Django, Supabase, and cloud APIs. Currently an R&D Engineering Intern at Nokia (OHUB), focused on backend systems, applied AI, API design, and reliable release engineering. Comfortable owning features end-to-end from authentication and API development through deployment, testing, and CI workflows. Public GitHub portfolio includes Web3 platforms, Supabase-backed SaaS applications, RAG-based assistants, and developer-focused AI tools with streamed model responses.

Education

B.E. Computer Science and Engineering (expected 2026)

Dayananda Sagar University, Bengaluru, Karnataka

CGPA: 8.91 / 10.0

Experience

Nokia — R&D Engineer Intern

Jul 2025 – Present

Bengaluru (on-site), OHUB

- Automated build and regression checks that reduced manual validation cycles for OHUB platform releases.
- Delivered internal APIs and backend services integrated with existing Nokia tooling used by R&D teams.
- Expanded unit and integration coverage with reproducible fixtures alongside CI pipeline updates.

Independent Projects

2023 – Present

- Shipped public full-stack and Web3 repos spanning traceability, auctions, and LLM-backed document flows on GitHub.
- MediTrustChain and DeFi-Homes combine web, contracts, and wallet flows; KNOWLEDGE-BASE and AI-GRAMMAR pair Supabase with Groq/OpenAI behind signed-in clients.
- Tightened async UI state around model calls and uploads to cut failure modes in deployed demos.

Technical skills

Languages: Python, TypeScript, JavaScript, Java, C, SQL, HTML/CSS, Solidity, Dart

Frontend: React, Next.js, Tailwind CSS, Vite

Backend: Django, Django REST Framework, Flask, Express.js, Node.js, REST APIs, sessions, JWT authentication

Databases: PostgreSQL, MySQL, MongoDB, Supabase (Auth, RLS-aware clients)

AI/LLM: OpenAI API, Groq, Gemini API integrations, prompt engineering, RAG, streamed responses in the browser

Web3: Ethereum/Sepolia, MetaMask, ethers.js, contract-aware front ends, on-chain auctions and provenance tracking

DevOps: Docker, Git, GitHub, CI/CD, unit and integration tests, Playwright, Selenium

Deployments: Dockerized services, Render, Vercel, AWS S3 uploads

Publications

MediTrustChain — Blockchain-Based Pharmaceutical Supply Chain Traceability with AI-Assisted Anomaly Detection

ICAISE 2026, Springer Nature (forthcoming) | [Springer listing](#)

DefiHomes — A Decentralized Real Estate Auction Platform with Transparent On-Chain Bidding

ICDMIS 2025, Springer Nature LNNS (published) | [Springer listing](#)

Smart Cradle — Secured Assistance and Monitoring System for Babies Using IoT

IEEE conference publication | [IEEE Xplore](#)

Projects

MediTrustChain

Next.js · Solidity (Sepolia) · Supabase · Flutter

- Delivered batch traceability with on-chain provenance and anomaly signals for monitoring teams.
- Unified web and Flutter clients on one authenticated backend for regulated workflows.

DeFi-Homes

React · Vite · Tailwind · Supabase · MetaMask · ethers.js

- Enabled MetaMask-based bidding with Supabase-backed listings and price history charts.
- Kept bid history on Ethereum testnets while profiles and inventory stayed in Postgres.

KNOWLEDGE-BASE

React · Vite · Supabase · Groq · Markdown

- Reduced time-to-answer by pairing Groq generation with stored Markdown pages behind Supabase auth.
- Improved reliability with structured loading, cancellation, and error handling for model calls.

PDF-to-Text Converter

Python · Flask · OCR.space · Docker

- Automated PDF-to-text extraction with native parsers plus OCR for scans, cutting manual copy-paste by roughly 80% on mixed document sets.
- Packaged a Dockerfile and deployment notes for repeatable cloud or local runs.

Additional: eden-thought (Django, PostgreSQL, S3, Render), AI-GRAMMAR (Node, Express, EJS, OpenAI), Student-Management-System (Django 5, RBAC) | [All repositories](#)

Certifications

Google Cloud, Amazon Bedrock, IBM AI Fundamentals, Django 5, Prompt Engineering, Generative AI (LLM), Infosys Springboard

Languages

English, Kannada, Hindi, Telugu.
